

SAFE SCHOOL STREETS - WILLOW PARK SCHOOL

Interim Installation

LEGEND

- 
Pick up / Drop off Zone
 Pick up / Drop off zones are located on Compton Street and Eban Avenue to reduce vehicle congestion in and around the school gate. Pick up and Drop off location are located on one side of the road to encourage a counterclockwise loop system around the school. Parents are expected to stay in their vehicles for Pick up and Drop off to be effective.
- 
Park and Walk
 Parking locations for parents/caregivers of Willow Park students to park and walk their children to the gate.
- 
Mini Roundabout
 There will be a roundabout at the Compton / Eban intersection on the school loop, which will improve the drop off and turn around process and encourage an anti-clockwise flow of traffic. (* Note: One-Way Trial)
- 
No Parking Area
 There will be no parking around the school gates on Compton Street.
- 
School Zone Threshold
 There will be new thresholds on Eban Avenue and Moore Street. This will force cars to slow down as they arrive near the school zone.
- 
Existing Pedestrian Crossing
 Existing pedestrian crossing on Compton Street, Eban Avenue and Sylvia Road will continue operating as normal.
- 
Improved Pedestrian Crossing
 In order to improve safety at the intersection crossing location, there will be a raised courtesy crossing to slow vehicles speeds and provide a safer crossing platform.
- 
Tightened Intersection
 In order to improve safety at existing intersection crossing locations, there will be intersection tightening to reduce the distance between footpaths and reduce vehicles speeds which will provide students a safer crossing experience.
- 
One-Way Compton Street Trial
 The two week trial looks to create a physical barrier to the Compton Street & Moore St intersection prohibiting entry from the southern end. This will help in enforcing the anti-clockwise system. This trial will be monitored and assessed for its effectiveness. If it is not pursued, an additional roundabout will take its place in the Compton St / Moore St intersection.
